### **Part III DETAILED ACTION**

The amendment-after-final filed April 2, 1996 has been entered and claims 17-19 have been entered by the amendment filed November 1, 1996. Claims 11, 13, 15 and 17-19 are pending in the application.

Claims 13 and 18 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention.

There is no indication in the original specification or claims that the instant invention contemplated antibodies to a peptide:antibody complex. The only antibodies mentioned in the specification are those which bind viral peptides. In the event that applicants are able to point to support in the specification for anti-complex antibodies, it should be noted that the claims as written read on anti-immunoglobulin antibodies (which are not mentioned in the specification either).

Claims 11, 15, 17 and 19 are allowable over the prior art of record.
